366-P ScottsCoir™ Growing Medium

for Potted Plant, Bedding and Hanging Basket Production

Stock No. 92251 (3 cu. ft.)
Stock No. 92530 (Minibulk)
Stock No. 92248 (Bulk)

Ingredients
- 30-40% Specially Processed Coconut Coir Pith
- 20-30% Medium Grade Horticultural Vermiculite
- 20-30% Composted Pine Bark
- 10-20% Horticultural Perlite
- Proprietary Starter Nutrient Charge and Other Ingredients

Package
- Palletized 3 cu. ft. (60 cu. ft. Minibulk and Bulk available in some locations)

Dry Bulk Density
- 16.0-18 lb./cu. ft.

Typical pH Range After Wet-Out with Fertilizers
- 5.2-6.4

Product Features
- Rapid, uniform wet-out upon irrigation
- More total pore space, more available water holding capacity than peat products
- Less shrinkage in the growing container than peat-based media
- No peat moss sticks so bedding plant cell paks are more uniform

Product Uses
- For cuttings and “direct stick” applications
- Growing on medium for a wide range of crops and container sizes
- Use with overhead, subirrigation, and drip systems

Fertilizer Systems
- Base fertilizer selection upon water quality analysis
- Wet-out with medium with Peters® or Miracle-Gro® EXCEL™ fertilizers
- Miracle-Gro® EXCEL™ 15-5-15 alternated with 21-5-20 is one suggested program that has had proven success

Scotts soilless media are laboratory tested for chemical and physical characteristics at the time of manufacture to assure excellent product performance. Scotts soilless media are formulated to produce the proper balance between plant available nutrition, moisture, and root growth. A lean starter charge provides the proper base to compliment a variety of Peters®, Miracle-Gro® EXCELTM and/or Osmocote® programs to produce the quality of plants professional growers desire. Scotts Quality Assurance Program for growing media is unmatched in the commercial growing media industry.
