Formalism in Landscape Architecture

Ancient Egypt

*Egyptian gardens:* Represent human domination over plants

Formalism originated in Egyptian gardens
Originated at edge of desert where natural vegetation sparse
No natural landscape to copy except natural oasis
Pools to supply “oasis feeling”
Plantings ordered in straight lines for irrigation
Irrigation canals common feature
Gardens enclosed on flat land
Fences and walls to protect plants
Plants treated architecturally:
 Arbor, bower, pergola: lattice work covered with vines for shade
Plants originally placed on random but became ordered and symmetrical
Statuary and columns

Formal Egyptian Garden

The approach is from a long canal (at right), and the entrance to the grounds is through an imposing gateway in their surrounding walls.

Of particular interest are the two clearly indicated different types of palm trees growing around the garden.

The single-trunked tree is the date palm and the bifurcated tree the doum palm.

Medieval and Renaissance Gardens

Medieval gardens originated in the monastery. Gardens were a combination of the villa rustica and the academy.
This miniature, in the *Roman de Renaud de Montauban* of c 1475, shows Maugis and La Belle Oriande seated in a garden of rather formal design.
